Harry,

Here is some of the information that we need. If you have any questions, please contact Phil Dellinger at 214-665-8324 or Ray Leissner at 214-665-7183. I will be in the office today, however, I will be out of the office on Thursday afternoon and all day Friday.

Thanks,

Stacey B. Dwyer, P.E.

A. Here is a scan of the tables that were hand delivered to William Honker by Craig Holmes at the EPA/UEC/TCEQ meeting in Austin on September 7, 2012.

2 files, because my scanner didn't scan the 4th page with the original file.

- UEC water level data.pdf

- UEC water level data p4.pdf

Question: What is the date for these water level measurements ?

Question/Issue: On Monday, September 24, 2012, Craig Holmes sent Stacey Dwyer a " sand B Summary Table" with water level data from 2008, 2010, and 2012. However, this data does not appear to match up for any of the years on the table . If this data is from another month of a year , please correct your table and add this data with the correct month and year . Please refer to Item B below for the Summary Table.

B.

Summary Table

Sand B Summary.xlsx

C. Please provide the date for the A-A' south fault cross sections . I assume the cross sections were based on data from a previous year (include both the date of data and a date of generation for this cross section). Email from Harry Anthony to Stacey Dwyer , et. al on Sept.14, 2012.

D. See email from Harry Anthony to William Honker , et. al. The first file (labeled Goliad Clay Thk and Hydraulic Gradient Details West to East), page 4 has a graphic titled "February 2012 B-sand (graben wells) Water Levels.

Question/Issue: The contours do not exactly match the data that was submitted to EPA in the Summary Table (See item B above in this email). Please ensure that all the data that is in this graphic for

February 2012 is reflected in the Summary Table .

Subject: Final Technical information for Goliad Aquifer Exemption

Dear Bill,

Attached are the remaining files further detailing the Goliad clay thicknesses by sand throughout the entire area of review, and hydraulic gradient supporting the directionally of water flow from West to East.

I'd like to propose that we follow up with a call on Monday afternoon after your review of the information to conclude any lingering questions... Hopefully we can finalize everything over a phone call negating the need to meet in Austin Wednesday morning.. But if that is what is needed, we are prepared to sit down with TECQ and EPA at that time.

Thank you, and have a good weekend..

E. Water Level Data disregarded . From our discussion , at least 4 data points were not considered in the development of contour maps (specifically, BMW-7, PTW 4 through 6).

Question/Issue: I have the justification for disregarding BMW -7, but need a justification for all data that was not considered . Please include the contractor's name that took the water level data measurements .
